

A reviewer for the *Journal of Oral and Biomedical Sciences* plays a critical role in maintaining the quality and integrity of the research published. Their responsibilities generally include:

1. **Evaluating Manuscripts:** Reviewers assess the submitted manuscripts for scientific rigor, relevance, originality, and contribution to the field of oral and biomedical sciences. They verify if the research questions, methodology, and conclusions are sound and credible.
2. **Providing Constructive Feedback:** A reviewer offers detailed feedback, pointing out strengths and areas for improvement. They may suggest modifications to enhance clarity, accuracy, and comprehensiveness. Constructive feedback is crucial for helping authors improve their work.
3. **Assessing Ethical Standards:** Reviewers check for ethical compliance, such as ensuring proper consent was obtained, conflicts of interest were declared, and that the study adheres to ethical research guidelines.
4. **Recommending Decisions:** Based on their evaluation, reviewers recommend whether a manuscript should be accepted, revised, or rejected. They provide justifications for their recommendations to assist the editor in making a final decision.
5. **Confidentiality:** Reviewers must maintain confidentiality throughout the review process, ensuring that they do not disclose any details of the manuscript outside of the review discussion with the editor.
6. **Timeliness:** To ensure a smooth publication process, reviewers are expected to complete their reviews within a designated timeframe. This helps the journal maintain timely publication schedules.
7. **Continuous Improvement:** Through their expertise, reviewers help maintain and improve the journal's standards, contributing to its reputation and impact in the field of oral and biomedical sciences.

Reviewers thus play a vital role in shaping the quality and direction of research in their field.

Please note that the journal is free online, therefore, your contribution would be of no charge.
